All the output, and who leads it today

A joint report by Muggy and Maggie — Friday, November 13, 2026

The whole story in short lines

1. This is every standing output and live project the two AIs produce for Clay, in one list.

2. Each row names who leads it in fact today. No assignments are made in this report — assigning leads is Clay's call, and the last part of this report is a blank worksheet for those calls.

3. Muggy leads most of the daily morning work. Maggie leads the maps, the health data pipeline, and the newest pieces (the trails document). A few pieces are joint.

4. Effort is marked "not measured" wherever no record measures it. Nothing in this report is guessed.

Part 1 — Standing outputs (recurring)

| Output | What it is | Lead today | How often | Where it stands |

|---|---|---|---|---|

| The Morning Scroll | The daily Skyrim-voiced paper for Payson | Muggy (editorial lead; Maggie contributes stories from Nov 13) | Daily | morning-scroll-53x.pages.dev |

| The Steward's Ledger | A daily record, factual, riding inside the Scroll site | Muggy | Daily | Inside the Scroll site |

| The Morning Menu | The daily index page, one row per report | Muggy | Daily, 5:45 AM | claypnw.github.io/menu |

| Last night's KPIs | The overnight jobs scorecard | Muggy | Daily | PDF through the Morning Menu |

| My Daily Review | A daily page of stories with listen recordings | Muggy | Daily | claypnw.github.io/my-daily-review |

| The AI community report | What public groups say about Muse | Muggy | Daily | claypnw.github.io/report-on-muse-ai-communities |

| The Muse connectors report | The daily catalogue of Muse's connections | Muggy | Daily | PDF through the Morning Menu |

| The Muse connectors weekly review | The Tuesday-night review of the same | Muggy | Weekly, Tuesday night | PDF |

| The Gilded Pages healthcare rollout | Businesses added to the Gilded Pages directory in stages | Muggy | Daily | claypnw.github.io/gilded-pages |

| Yard and estate sales sheets | The day's qualifying sales around Payson | Muggy | Daily | PDFs inside the Scroll site |

| The GitHub billing watch | Build minutes and billing check | Muggy | Daily | Report through the Morning Menu |

| The effort log | The standing measure of work done | Muggy | Nightly | Page in the test repository |

| The Work Now page | Running, waiting, and finished work at a glance | Muggy | Standing | A page in Clay's Muse account |

| The escrow safekeeping set | Backup copies of all production, both AIs' | Muggy | Daily | Private safekeeping repositories |

| The interactive maps (World of Nirn) | Skyrim maps of this area, with lore pop-ups | Maggie | On demand | Under the Hearth build page (published per Muse's record, Nov 11; Maggie marks deployment unverified on her side) |

| The Samsung Health master pipeline | Phone health data gathered into one master file | Maggie | Daily check at midnight; monthly keeping | Private Health repository |

| The Raven's Reach board checks | The message checks that keep the two AIs in contact | Joint — each side runs its own check job | Muggy: every 30 minutes, faster while a talk stands open. Maggie: hourly | The private Health repository |

Part 2 — Projects, one-offs, and parked pieces

| Output | What it is | Lead today | State |

|---|---|---|---|

| The camera viewer and setup job | His own viewer page for the house cameras, and the one-click setup job | Muggy; Maggie gives testing recommendations | Built and machine-tested; never run on Clay's PC; one phone-address point open between the AIs |

| The mailbox audit | Old ads, subscriptions, and purchases sorted from his mail | Muggy | Part-done; the full mail file download stands partway (about two thirds) with a November 18 deadline |

| The Raven's Reach reconciliation design | A faster, checkpoint-based way for the two AIs to check the board | Joint | Agreed

between the AIs; waits on Clay's approval |

| The morning dashboard / Project Command Center | One page joining project state with the report index | Joint design; Maggie built the first prototype | Design stage; not production |

| The Cloudflare moves and GitHub minutes reduction | Moving the public pages off GitHub's meter | Joint; Muggy does the publishing | The Scroll is moved; five sites parked, waiting on an authorized route that asks nothing of Clay |

| The 2027 benefits decision guide | The health cover comparison for 2027 | Maggie produced the guide; the rebuild is joint | The first pick was withdrawn; the rebuild waits on three of Clay's five answers |

| The family album design | A design for the family photo-and-voices site | Maggie, design side | Design only — not production; Clay has not approved it |

| The trails document | Trails, guest adventures, and photos, growing out of the maps | Maggie | Starting, at Clay's word on November 12 |

| The guest landscape photos | A guest's landscape photo with the Skyrim city placed in it | Unassigned — parked idea | An idea to look into when it gets closer |

| The ChatGPT connector report | A catalogue of ChatGPT's connections, matching Muse's | Maggie | Planned; not yet standing |

| One-off pieces (3D models and the like) | Single pieces made in

chat, as asked | Maggie | Historical, on demand; no standing upkeep |

Part 3 — The decision worksheet (Clay's calls)

Print or mark this page: write the lead and support you choose beside each piece. The report makes no assignments.

| Piece | Lead (your call) | Support (your call) |

|---|---|---|

| The Morning Scroll | | |

| The morning set (Menu, KPIs, My Daily Review, AI community report) | | |

| The Muse connectors reports | | |

| The Gilded Pages rollout | | |

| The Steward's Ledger | | |

| The maps | | |

| The trails document | | |

| The health data pipeline | | |

| The 2027 benefits work | | |

| The camera viewer | | |

| The Cloudflare moves | | |

| The Raven's Reach board | | |

| The Work Now page and dashboard | | |

| The mailbox audit | | |

Notes that ride with this report

1. Supporting jobs (nightly builds, watches, cleanup) are grouped under the output they serve, so nothing is counted twice.

2. The Skyrim look of the Hearth and the Scroll is settled and stands as a fixed condition on every piece it touches.

3. Where the two sides' records differ, the difference is printed in the row itself (see the maps row) rather than smoothed over.
